

**DELTA COMPLETE™** is a proprietary combination Drift Reduction Adjuvant (DRA) and Volatility Reduction Agent (VRA) that is specifically formulated for over-the-top dicamba chemistries. It provides drift reduction, volatility reduction, humectancy, defoam, and water conditioning—all in one formulation. With a molybdenum inclusion to support nitrogen uptake, **Delta Complete** provides the best agronomic and convenient offering.

**GROWER BENEFITS**

- Includes a non-AMS water conditioner and defoam system
- Most convenient offering to ensure approved DRA and VRA as required by EPA
- Top agronomic benefits provided with the convenience of a one-jug solution for DRA and VRA compliance
- Proprietary formulation with molybdenum inclusion assists with nitrogen uptake

**RATES**

1.75% v/v

	Drift Reduction Adjuvant (DRA)	Volatility Reduction Agent (VRA)	Delta Complete
Reduces off-target application of herbicides due to drift.	✓		✓
Reduces herbicide vaporization, leading to movement of application.		✓	✓
Contains a non-AMS water conditioner and defoam system.			✓
