

TACTIC™ combines the spreading properties of organosilicone with a quality sticker for the best possible droplet retention on the leaf surface. Tactic sticks insecticides and fungicides to the leaf surface preventing pesticide loss due to droplet shatter or bounce, and protects from rain and irrigation wash-off.

FEATURES

- Tactic produces excellent droplet deposition and rainfastness in minutes.
- Works in high or low volume sprays in ground or aerial applications.

RATES

>50 GPA: 8-16 fl oz/100 gal; 10-50 GPA: 16-24 fl oz/100 gal;
<10 GPA: 24-32 fl oz/100 gal

TARGET CHEMISTRIES

Fungicides, Insecticides

GROWER BENEFITS

- Resists wash-off from irrigation or rainfall.
- Efficiently covers the leaf surface with the spreading ability of an organosilicone surfactant.
