

ACCOMPLISH MAX is a proprietary biocatalyst designed to improve nutrient availability combined with natural marine-based technology which increases crop tolerance to abiotic stresses like cold temperatures and salinity from commercial fertilizers. Available in an easy-to-use liquid formulation, ACCOMPLISH MAX is labelled for nearly every crop.

FEATURES

- Accomplish Technology for nutrient extraction and Marine-based Technology for improved stress tolerance
- Designed for at-planting applications
- Compatible with most fertilizers, insecticides, fungicides and herbicides

GROWER BENEFITS

- Improved nutrient availability and uptake by facilitating nutrient mineralization in the soil
- A more fibrous and extensive root system to improve crop access to nutrients
- Increased crop tolerance to abiotic stressors like cold temperatures and salinity from commercial fertilizers

ACTIVE INGREDIENTS

Bacillus licheniformis

RATES

1-2 qt/A for most applications
