

# BOROSOL® 10

**Borosol® 10** is a patented soluble polyborate liquid for the prevention and correction of boron deficiencies in many crops. As one of the most critical micronutrients to full season crop development and quality Boron supports everything from early growth, to flowering and fruit set. The flexibility of **Borosol 10** allows it to be mixed with other liquid fertilizers for foliar or soil applications.

## FEATURES

- Convenient liquid formulation is easy to handle, measure and apply
- Flexible and compatible - Borosol 10 mixes well with most plant growth regulators, insecticides and herbicides
- Sound for application in both soil applied and foliar applications

## RATES

Soil Application: 1-3 gal/A; Foliar Application: 1-3 qt/A

## GROWER BENEFITS

- Foundational agronomic option for Boron fertilization in plants with a high need for this critical micronutrient
- Plant treated with Borosol 10 take up Boron more quickly and efficiently than a standard boric acid alternative
- Supports early season growth and development as well as critical process during reproductive stages

## ANALYSIS

10% Boron
