

# ReaX<sup>PLUS</sup> BORON

## PRODUCT FEATURES

- Unique C<sup>2</sup> formulation improves overall nutrient availability and uptake in the plant
- Carbon-based Technology (biologically extracted leonardite) further enhances nutrient uptake and improves crop tolerance to abiotic stress
- Plant safe nutritional formulation is flexible in soil and foliar applications and sound for many crops in many growing conditions

## ANALYSIS

- 5% Boron with C<sup>2</sup> Technology

## BORON AT-A-GLANCE

- Essential for cell division and differentiation
- Ensures pollen tube formation and reproduction
- Help insure timely silk elongation for optimum pollination
- Key to water use efficiency by regulating calcium and potassium
- Optimizes sugar/starch/protein balance and movement

## GROWER BENEFITS

- ReaX Plus Boron formulation aids in crop reproduction and early growth, flowering, and fruit set
- Supports soil microbiota for healthier, more biologically active soil
- Enhances buffering capacity to moderate accumulated salt effects in the soil
- ReaX Plus Boron will help finish and sugar crops when applied at the right time

## RATES

- Soil application: 0.5-4 qt/A
- Foliar application: 1-2 pt/A
