

AWAKEN COFLOW is the Smarter Seed Treatment for corn, to help with early corn growth, precision seed placement and dust-off control. A unique seed treatment formulated with a seed corn polymer, it contains a complex of zinc ammonium acetate with potash, providing a balanced nutrient package including N, B, Cu, Fe, Mn & Mo & Zn

FEATURES

- Proven and effective seed nutritional including zinc and other essential micronutrients
- Unique formulation Includes a corn-specific seed polymer
- Low dust-off and excellent finishing characteristics

ACTIVE INGREDIENTS

Micronutrients including 3.7% Zn, formulated with a corn-specific flowability and dust-off polymer

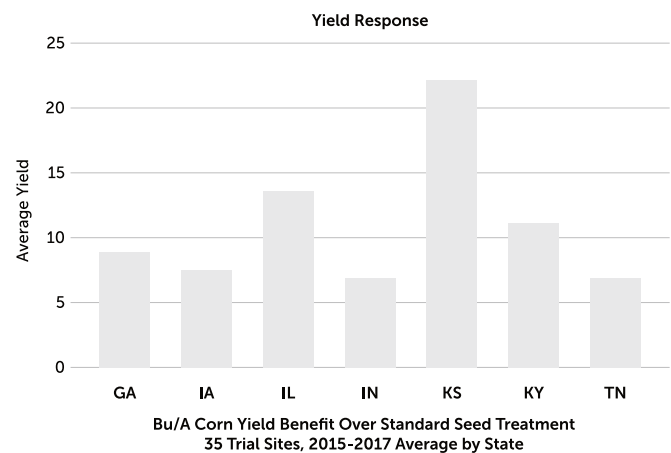

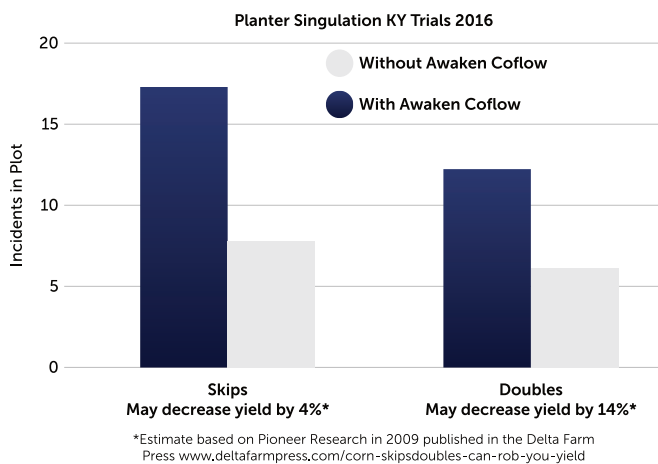

GROWER BENEFITS

- May stimulate early corn growth by providing essential micronutrients and extracting nutrients from the soil
- Has been shown to increase seed flowability and improve precision seed placement
- Can decrease dust-off for good seed treatment stewardship

RATES

6-10 fl oz/100 lb of seed
